

Attachment #2

Telephone Switchframe Room

STATINTL

The attached letter dated 5 November 1965 was forwarded to the Telephone Company requesting their estimate of space required for a [REDACTED] line addition to the main P.B.X. switchframe located in the Headquarters Building. The Telephone Company was requested to base their reply on the following three assumptions:

(a) The required additional space would be contiguous to the existing switchframe room.

(b) The required additional space would be located elsewhere in the Headquarters Building.

(c) The required additional space would be in another building located on the Headquarters grounds.

STATINTL

The above letter is based on the assumption that those Agency personnel located in the Rosslyn, Virginia - Downtown, D. C. area would be relocated to new space on the Headquarters grounds and several from the Headquarters Building Switchframe. Also, the existing [REDACTED] located in South Building would be disconnected.

The requested space estimates will be in addition to the 5,874 sq. ft. presently housing the existing equipment in the Headquarters Building.

A copy of the reply to the above letter is attached.
